

Monterey County Community Resource Guide

About Us

The National Center for Youth Law envisions a future where each and every young person in foster care, experiencing homelessness, or under the jurisdiction of probation, graduates from high school with a wide array of possibilities for their future. We join in solidarity with a growing movement across the country to ensure equitable opportunities and outcomes for ALL young people.

To achieve this shared vision, it is imperative that leaders from multiple public systems – child welfare, education, mental health, probation, judicial agencies, and the rich landscape of community organizations – band together with persistence and collaboration to build the conditions under which:

- Children and youth are engaged in learning, empowered to create futures they are excited about, and have champions in their corner for the long run.
- Parents, family members, mentors, and other trusted adults are fully invested in their role as education champions and are consistently and meaningfully supported.
- System and community leaders collaborate deeply on a shared vision that lifts up the voices of young people and helps realize equitable opportunities and outcomes for all students.
- Professionals working directly with young people in support of their education are appreciated, supported, and connected with one another.

Using this Resource Guide

In support of this vision, we have compiled a Community Resource Guide of available programming and services for young people in Monterey County. This guide can be utilized by community members or service providers to connect young people, especially those experiencing homelessness, with programs, services, and other community resources. Resources are categorized by type and may appear more than once throughout the Community Resource Guide, in each of the relevant service categories.

Recognizing the fluidity in available programming and services, this Community Resource Guide will exist electronically and can be continually updated for ongoing accuracy.
